

Brainstorming & Idea Prioritization Template

Date	
Team ID	xxxxxx
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage. (This is a single-member team, so all ideas were generated by Arumparithi B.)

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Arumparithi B	AI tutor that answers students' academic and general-knowledge questions instantly in simple language	Learning support / Q&A	1
2	Arumparithi B	Concept explainer that breaks complex topics (e.g. Photosynthesis) into student-friendly explanations, runnable on a lightweight local model	Learning support / Explanation	1
3	Arumparithi B	Automatic MCQ quiz generator from any topic or passage with instant answer checking and score	Assessment	2
4	Arumparithi B	Summarizer that turns long textbook passages into short revision notes	Revision	2
5	Arumparithi B	Personalized learning-path recommender (beginner to advanced) with timelines and free resources	Personalization	3
6	Arumparithi B	Voice-based, multilingual study assistant and mobile app with progress tracking	Accessibility / Future scope	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Gemini-powered Q&A and concept explanation (local LaMini-Flan-T5 with Gemini fallback)	High	High	1	Yes
2	Quiz generation (JSON MCQs with interactive answer checking) and passage summarization	High	High	2	Yes

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
3	Personalized learning-path recommendations (selected); voice, multilingual and mobile app kept as future scope	Medium	High	3	Yes (learning path) / No (voice & mobile - future scope)

Outcome: Final selected solution: EduGenie - a single web application (FastAPI + HTML/CSS/JS) that combines Q&A, concept explanation, quiz generation, summarization and learning-path recommendations using Google Gemini.
