

Project Initialization and Planning Phase

Date	03 October 2026
Team ID	SWTID-2026-7859
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you to find the ideal solution for your customers' challenges.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A school student preparing for exams	quickly understand difficult concepts and get my doubts cleared	textbook explanations are long and complex, and no teacher is available after class	search results and videos are scattered, too advanced, or take too long to go through	confused, stuck and anxious about my exams
PS-2	A college student / self-learner	check how well I understand a topic and revise long chapters quickly	I don't have practice questions for every topic and revision takes hours	creating quizzes and summaries manually is slow and there is no instant feedback	unsure about my preparation and overwhelmed by the volume of content
PS-3	A beginner who wants to learn a new skill (e.g. SQL)	follow a structured plan from beginner to advanced	I don't know which topics to learn first or which resources to trust	online content is unorganized and not adapted to my current level	lost, demotivated and likely to give up

Solution Direction

EduGenie addresses these problems with one simple web app powered by Google Gemini: instant answers (Q&A), simplified explanations, auto-generated quizzes with feedback, concise summaries, and personalized learning paths.
