

Problem-Solution Fit

Date	03 October 2026
Team ID	SWTID-2026-7859
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The canvas below checks that EduGenie addresses the root causes, behaviors and limitations of its target audience.

1. CUSTOMER SEGMENT(S) [CS] School and college students, self-learners and beginners learning a new skill (e.g. SQL).	6. CUSTOMER LIMITATIONS [CL] Limited time before exams, little or no budget for tutors, low-end laptops or phones, limited access to teachers after class.	5. AVAILABLE SOLUTIONS - PROS & CONS [AS] Search engines / YouTube: free but scattered and too long. Private tutors: personal but costly. Textbooks: reliable but dense. Generic chatbots: powerful but not focused on learning tasks.
2. PROBLEMS / PAINS + FREQUENCY [PR] Hard-to-understand concepts, no practice questions, long chapters to revise, no study plan - faced daily during study and exam weeks.	9. PROBLEM ROOT / CAUSE [RC] Learning content is one-size-fits-all, not simplified, and offers no instant feedback or personalized guidance.	7. BEHAVIOR + INTENSITY [BE] Students search online, watch long videos, re-read notes and ask friends - spending hours, with high stress before exams.
3. TRIGGERS TO ACT [TR] Upcoming tests, a doubt during homework, a peer recommending an AI study tool, wanting to start a new skill.	10. YOUR SOLUTION [SL] EduGenie - a free, lightweight web app powered by Google Gemini that gives instant answers, simple explanations (local LaMini-Flan-T5 or Gemini), auto-generated quizzes with feedback, concise summaries and personalized beginner-to-advanced learning paths.	8. CHANNELS OF BEHAVIOR [CH] ONLINE: uses EduGenie in the browser, searches the web, watches tutorials. OFFLINE: classroom learning, textbooks, group study; local explanation model works without cloud AI.
4. EMOTIONS BEFORE / AFTER [EM] Before: confused, anxious, overwhelmed. After: confident, motivated, in control of learning.
