Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Coordinating work between two members with different schedules	Daily check-ins and clear ownership per module (backend / frontend & testing)
2	Keeping code and documents in sync while both members made changes	Used one shared GitHub repository, small focused commits and reviewed each other's changes
3	Sharing the Gemini API key safely	Each member kept the key in a local, git-ignored .env file; only .env.example is committed
