Empathy Map

An empathy map of the primary EduGenie user - a student - from four perspectives: what they Say, Think, Do and Feel in relation to learning difficult topics and preparing for exams.

SAYS • "This chapter is too long to read before the test." • "I don't understand this concept from the textbook." • "I wish I had practice questions for this topic." • "Where should I even start learning SQL?"		THINKS • Am I really prepared for the exam? • Searching online takes too long and the answers are too advanced. • I need explanations in simple words with examples. • I want to learn at my own pace.
	PERSONA Priya, 16 <i>(School / college student learning with EduGenie)</i>	
DOES • Searches Google / YouTube for explanations • Re-reads long notes and textbook passages • Asks friends or teachers for doubts (when available) • Studies late, often on a phone or low-end laptop		FEELS • Confused and overwhelmed by complex content • Anxious and stressed before exams • Frustrated by scattered, unstructured resources • Motivated and confident when concepts finally click

The persona is a representative user created for this analysis.
